

ENGLISH

We have 2 great stories to inspire our own writing this half term. The first is "The Girl with the Yellow Bag" - an intriguing film stimulus. The second is a fabulous book called The Lion Inside. Look forward to some fantastic stories!

MATHS

We will start the summer term with work on fractions including halves and quarters (thirds too for year 2!) Then whilst year 1s look at multiplication and division, year 2s will work on measures and statistics.

SCIENCE

Our science work this half term is linked to properties of materials. We are going to develop a good understanding of what melting and evaporating mean.

GEOGRAPHY

In geography lessons, we will explore the nature of farming and consider why farming is so popular in our local area.

We will think about the processes involved in 'farm to fork'... how does food end up on our tables?

SUMMER 1

Dolphins Class

COMPUTING

In computing, we will be using a range of media to create animated story books.

ART

In art, we will learn about the style and techniques used by Henri Rousseau to produce our own incredible paintings.

PE

On Wednesdays we will be **SWIMMING!!!!** There will be lots of adult support available to ensure all the children have a brilliant, safe, positive swimming experience.

On Thursdays we will be learning how to play popular striking and fielding games.

RE

In RE we will be learning about sacred places. We will look at churches, synagogues and mosques. We will think about why religious believers go to sacred places, what happens there, what features they have and what makes them similar and different to one another. There will also be an opportunity to reflect upon our own special places.

PSHE

We will explore positive and negative feelings and think about ways to maintain a positive mindset.
